## Importing MicroFreak Banks

---

Read Me

---

Here are the instructions to import additional preset banks for Arturia MicroFreak.

### 1 CONTENT OF THE ARCHIVE

- Readme.pdf : current text file.
- Abstract\_Freak.mfprojz: MicroFreak project to transfer with the Arturia MIDI Control Center
  - NB : "Abstract Freak" stands for the actual name of the bank you downloaded.

### 2 IMPORTING THE SOUNDS IN YOUR MICROFREAK

- MIDI Control Center installation:
  - Download the Arturia MIDI Control Center from this page: <https://www.arturia.com/products/microfreak/resources>
  - Launch the file and follow the different steps to get it installed on your computer
  - Launch the MIDI Control Center
- Transferring the presets:
  - Connect your MicroFreak to your computer
  - In the product list (top-left corner) select the MicroFreak
  - In the upper part of the project View, click on the "Import" button then "Import New Project"
  - Select the file Abstract\_Freak.mfprojz. This will create a new project named "Abstract Freak" (vertical list on the left)
  - Select the new project "Abstract Freak". This will display the related presets in the list aside.
  - You can then transfer those presets in the MicroFreak memory by simple drag-and-drops of an individual preset, or the whole project.
