

# IMMERSIVE MELODIES

---

Read Me

---

Here are the instructions to use the "IMMERSIVE MELODIES" presets for Arturia Microfreak.

## 1 CONTENT OF THE ARCHIVE

- Readme.pdf : current text file.
- Microfreak\_Immersive\_Melodies.mfprojz : Microfreak project to transfer with the Arturia MIDI Control Center

## 2 HOW TO USE

### 2.1 Importing the "IMMERSIVE MELODIES" sounds in your Microfreak

- MIDI Control Center installation:
  - Download Arturia MIDI Control Center from this page:  
<https://www.arturia.com/products/microfreak/resources>
  - Launch the file and follow the steps to get it installed on your computer
  - Launch MIDI Control Center
- Transferring the presets:
  - In the product list (top-left corner) select the Microfreak
  - Connect your Microfreak to your computer
  - In the upper part of the project View, click on the "Import" button then "Import New Project"
  - Select the file Microfreak\_Immersive\_Melodies.mfprojz. This will create a new project named "Immersive Melodies" (vertical list on the left)
  - Select the new project "Immersive Melodies". This will display the related presets in the list aside the list.
  - You can then transfer those presets in the Microfreak memory by simple drag-and-drops of an individual preset or the whole project.
